## Continued underlying margin improvements

- Gross margin increased vs. last year with 6.9 ppt to $44.7 \%$, mainly driven by price increases and lower shipping costs.
- Compared with Q3 2023 gross margin increased with 14 ppt, the increase was 0.6 ppt . excluding effects from changed obsolescence assumptions.

## Adjusted EBIT

- Adjusted EBIT weakened slightly from -23 SEKm last year to -24 SEKm.
- Impairment of the Other segment, trademark amortisation and the effect from changed obsolescence assumptions impact adjusted EBIT.
- Excluding these items adj. EBIT would have been -II SEKm.

Q4 202 Q 12022 Q2 2022 Q3 2022 Q4 2022 Q1 2023 Q2 2023 Q3 2023 Q4 2023

- Due to a strong cash position from end of 2022 , our focus has gradually shifted from driving sales and generate cash to margin improvements.
- Negative gross margin trend since 2021 primarily attributed to escalated shipping and supplier costs. The effect of these cost hikes have gradually been mitigated by passing them on to customers, initiated in QI 2023.
- Significant drop in the margin during first half of 2022, due to our focus on generating cash and reducing net debt.
- Since end of 2022 container prices continue to decrease and reach pre-pandemic levels. Shipping costs are accounted in the P\&L when the product is sold, hence it requires a few quarters until price decreases start to materialise in the P\&L.
- We observed no reduction in in-freight costs in Q4 2023, attributable to our focus on selling off overstocked inventory with higher associated in-freight costs. Looking ahead, we anticipate a continued decrease of in-freight costs, albeit at a more moderate rate than previous quarters. There is also a risk of potential increases in the coming quarters due to ongoing situations in the Red Sea region.
